

MOBIU

The secure PC on a stick that fits in your pocket – with a price to match

mobiu. A breakthrough in portable computing, allowing the user to unlock, access and use all their files, data and applications safely, securely, and privately **from any online PC**, wherever they are in the world.

mobiu. Makes your desktop truly portable! A real business tool designed it to meet the needs of any organisation that uses computers throughout and has a work force that needs to work away from the office, be that at home, with customers or in branch offices.

mobiu. Uses a unique patented technology platform for managing trusted transactions over the internet combined with the strong security identity of the SIM card (CHIP & PIN to you and me). Is it secure? This is the technology that Mobile Networks and Banks use in billions of devices and cards worldwide!

mobiu just made working away from the office both secure and affordable.

All this for an investment of only £135 + VAT

PRD Partnership Limited, Hartham Park, Corsham, Wiltshire
t: 01249 700036 e: enquiries@PRDpartnership.com

Just plug it into any online PC and enter your pin.

The easy to use menu will appear so that you can back up and organise your data, access your files, and browser as well as use the pre-loaded office applications.

Back up your PC to your mobivault and share documents securely in our unique mobiRooms

MOBIU

mobiu is more than just working away from the office

You get our unique online storage and data management software – your own mobiVault, controlled through your mobiManager. Not only is your data safely backed up, it's available via your mobiu from any online PC. We'll give you 5GB storage to start with, expandable as your needs grow. Don't worry that it could be accessed by others – your mobiu acts both as your key and encrypts your data, so it's unreadable by others.

It's pre-loaded with Softmaker word-processing, spreadsheet and presentation applications, as well as the Firefox browser, so you can work or browse anywhere without leaving any footprint on the PC you're using. It's as if you were never there!

And then there's our great online sharing feature. Our mobiManager application has an easy to use feature that allows the user to create shared online workspaces which we call mobiRooms. It's like your own private IT network, and allows you to enable true collaborative working, share data within a business and across project groups. No elaborate, costly and confusing networking or security to set up. Simply invite trusted users with a mobiu, create a mobiRoom and then drag and drop your trusted users into it.

The price of only £135 + VAT includes the first year's subscription to our Authentication Service, your online mobiVault and mobiRooms – subsequent years are just £60 + VAT
